

Ross Tanner, Product Test Editor

The following products were tested and recommended by PGA TOUR Partners Club members. The Member Rating is based on a 1-10 scale with 10 Excellent, 7 Good, 4 Fair and 1 Poor.

Nickent Golf 4DX Evolver Driver
888-NICKENT, www.nickentgolf.com, \$479

MEMBER RATING: 8.9 BEST FEATURE: PERFORMANCE
Using Interchangeable Shaft Technology, Nickent's 4DX Evolver driver lets golfers customize their ball flight with both the UST V2 and UST V2 high-launch shafts. The traditional-shaped 454cc clubhead makes room for the interchangeable hosel and places a significant amount of weight in the XW inserts for more forgiveness.

Bryan Robertson, Murrells Inlet, SC: "The 4DX Evolver driver is like having two drivers in the bag for the price of one. The V2 high-launch shaft gives me a controlled trajectory and the V2 shaft a lower ball flight, perfect for windy days."

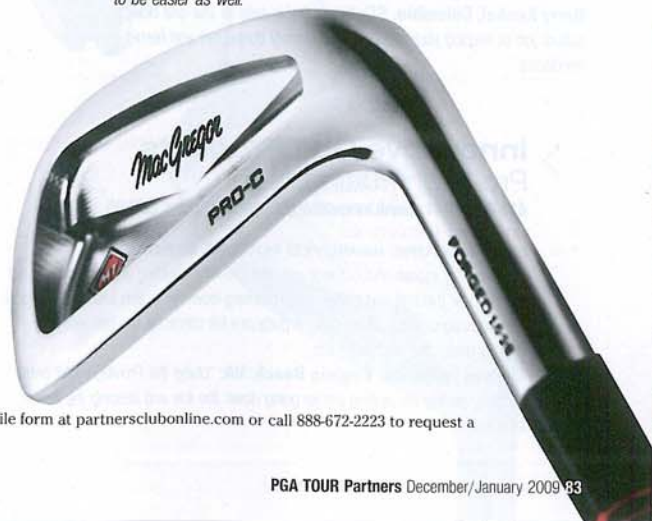

Tifosi Optics, Inc
Ventoux T-G570 Sunglasses
866-310-0996, www.tifosioptics.com, \$59.95

MEMBER RATING: 8.7 BEST FEATURE: QUALITY
Weighing only 25 grams, the Ventoux T-G570 sunglasses have adjustable nose and earpieces, ventilated lens and 100 percent UVA and UVB protection. They come with three interchangeable lenses, including a smoke green tint to help see the ball in flight and purple tint to spot subtle breaks on the green.
Clay Cromer, Cape May, NJ: "These sunglasses are stylish, comfortable and geared for the golf course. The interchangeable lenses are easy to use."

MacGregor Golf MT PRO-C Irons
800-841-4358, www.macgregorgolf.com, \$999

MEMBER RATING: 8.9 BEST FEATURE: FEEL
The MacGregor MT PRO-C irons are a muscleback design with a milled cavity back for enhanced forgiveness. The long irons have a lower-cut cavity for a higher launch and the short irons a higher cut for distance and trajectory control.

Lawrence Padilla, Kill Devil Hills, NC: "The MT PRO-C irons are more forgiving than any other forged iron I have hit and shaping shots seem to be easier as well."
