

Slip

To Remove a Lens:

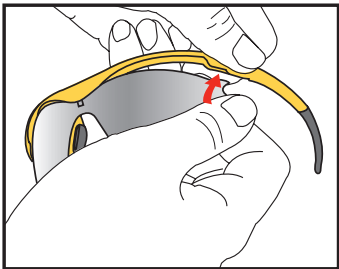

1. With the sunglasses facing you and the arms fully extended, pinch the frame just ahead of the hinge with your thumb and index finger. Pinch the outside edge of the lens with your opposite thumb and index finger. Gently flex the frame and pull your hands apart separating the outside lens anchor from the frame.
2. Repeat step one on the opposite anchor of the lens.
3. With both anchors of the lens free, pinch the center of the frame with your thumb and index finger. With your opposite hand pinch the bottom of the lens near the nose piece. Gently pull your hands apart completely separating the lens from the frame.

Slip

To Install a Lens:

1. Insert both lens anchors into the corners of the frames.
2. Slide the center of the lens up into the center cut in the frame.
3. Using your thumb, apply pressure upward to the center of the lens until you feel it click into place in the frame.
4. Using your Tifosi™ Microfiber cleaning bag, wipe any fingerprints off the lenses.
